

Semi-active Sensation is the Avantgarde Zero TAS

Avantgarde Acoustic Zero TA XD
\$15,500

Avantgarde's new Zero TA is the perfect answer for aficionados who appreciated AG's original and fully-active/DSP driven Zero but, nonetheless, retain a preference for their existing analog sources. The Zero TA (Teil Aktiv or semi-active) is for them. The semi-active spherical horn system has a 1" tweeter, 5" midrange, and powered (500W) DSP-controlled 12" woofer with 10-band parametric EQ. The sound was articulate, vibrant, and dynamic as expected but also possessed a low-level delicacy that stopped me in my tracks.
